Lunar Calendars
Year 1900 - 2099
Loy Chunpontong

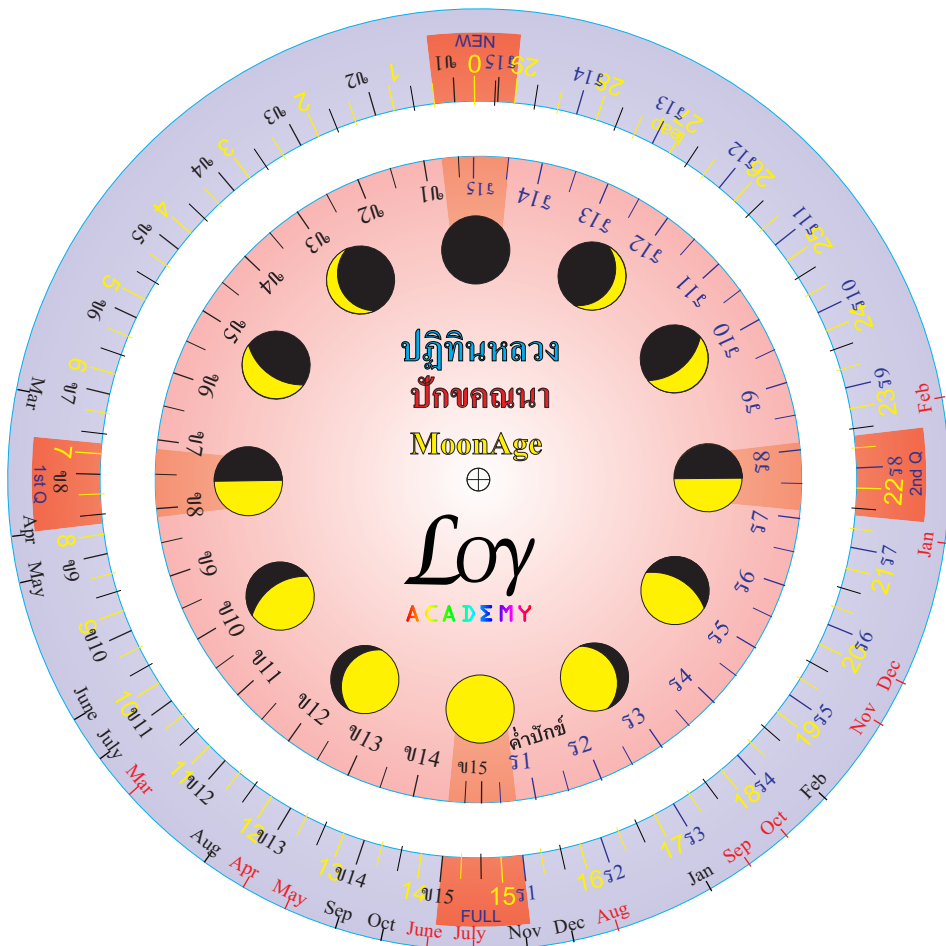

The new year starts on March 1st,
so Jan - Feb, use the year# before.

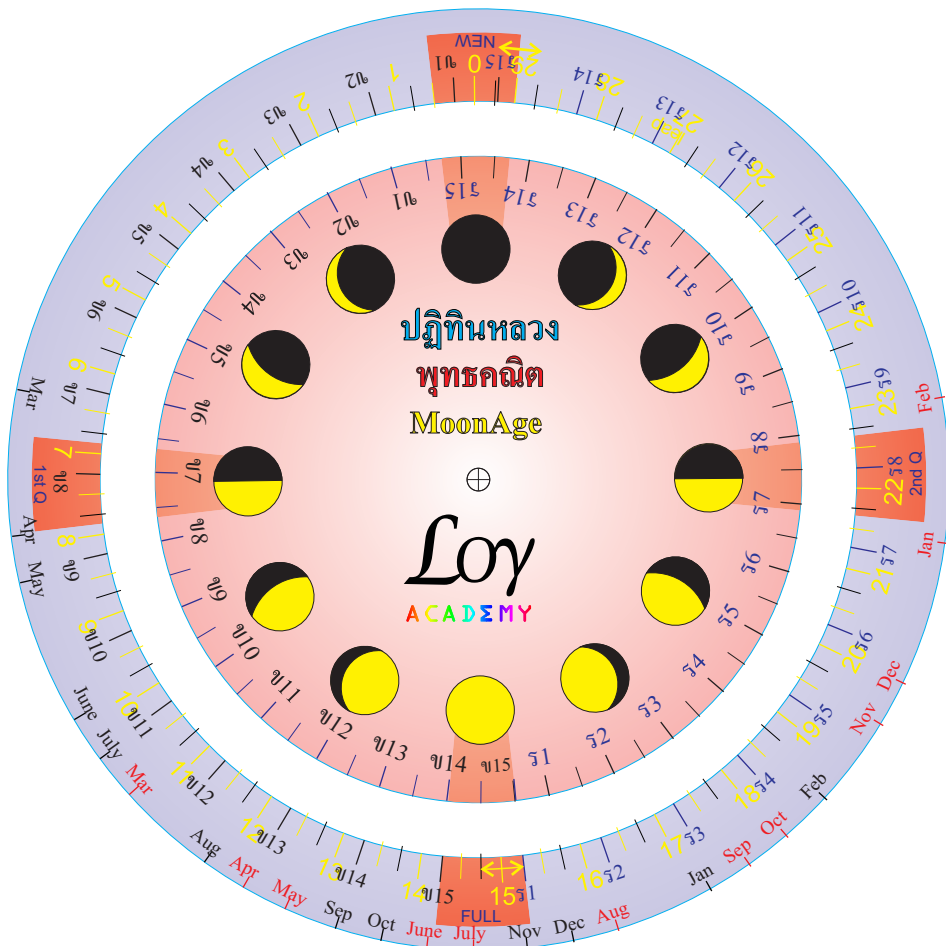

For AD 19xx, use month# in red

Years fall in group 8-14 contain intercalary month

For AD 20xx, use month# in blue

Years fall in group 6-12 contain an intercalary month
Lunar leap year, 5/N15 (Apr.) will fall in the yellow gap

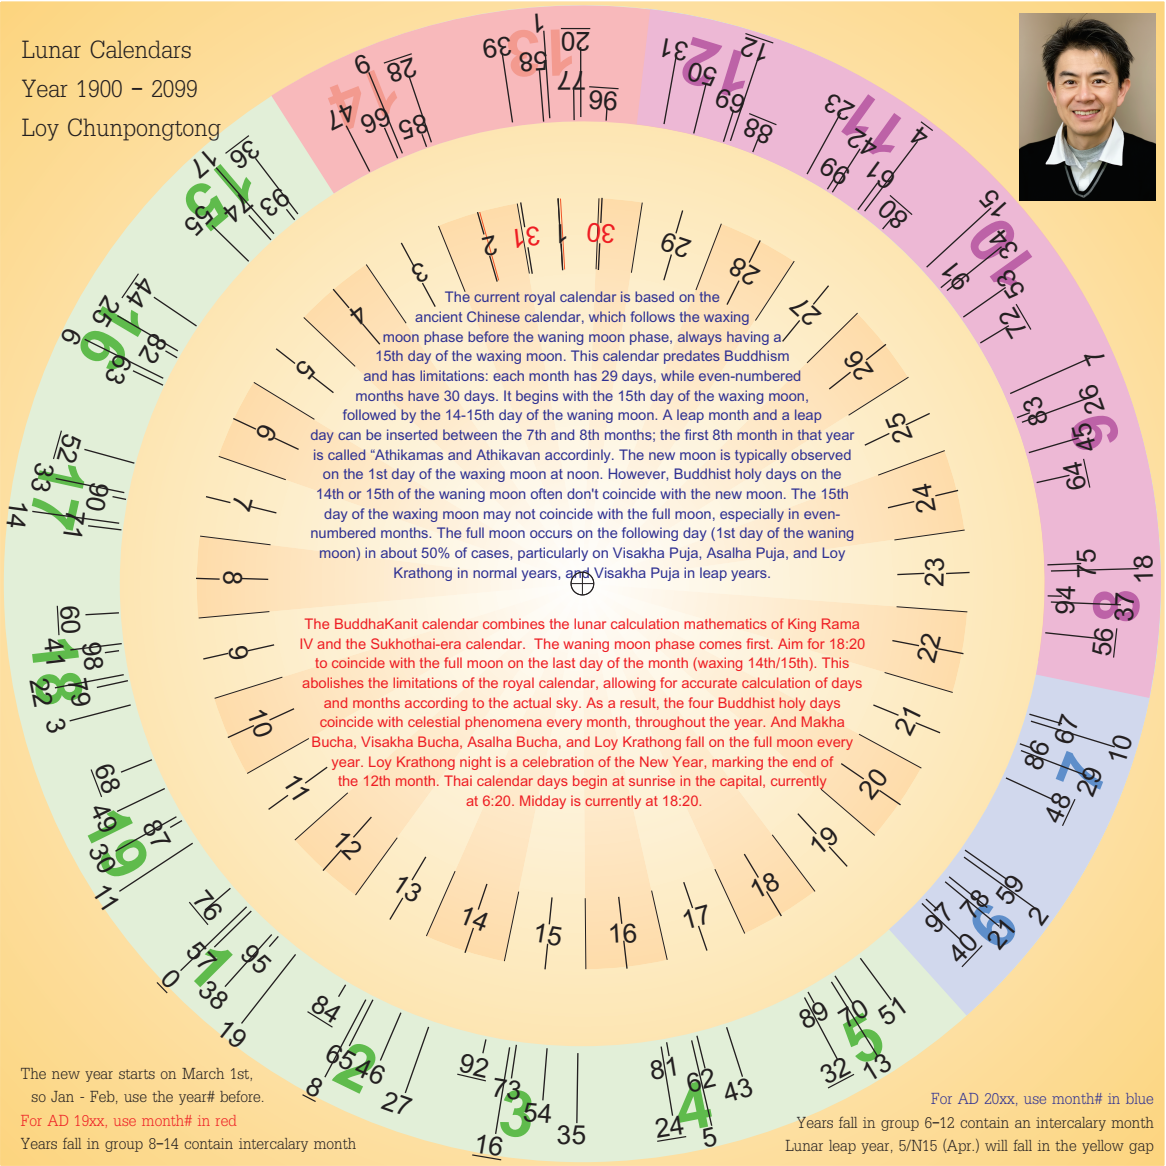

Lunar Calendars

Year 1900 – 2099

Loy Chunpongtong

For the Royal Thai Calendar (RTC)
 an odd month = 29 days
 an even month = 30 days

Leap month: every 2.71 years
 (average) assigned after 7th month

Leap day: every 5.16 years
 (average): as 30th of 7th month

The Buddhist Holy days in Pali
 Canon normally fall on ๗.1,
 ๗.8, ๗.15, ๗.8 in the RTC.
 The chance of full moon on
 ๗.15 and ๗.1 are 50% equally
 including Visak and Asaha
 may not full moon on ๗.15

e.g. 25 January 2007
 Century = 20, Year = 07

Finding the lunar date

1. Jan-Feb, use the the year before, so use 06 in this case (not 07)
2. Locate Year# 06 in the below table, find 16 as the Group# beside it.
3. Find Group#16 in the outermost circle, you will find the Year# 6
4. Find the **Blue Jan for 20xx** (or **Red Jan for 19xx**) on the disk and rotate to align with 6.
5. The 25th date on the plate will align with the lunar age 6.8 and lunar date 7 on RTC and 7 on Pakkha.

Finding the lunar month

1. Find the lunar date from the left
2. Find the full moon date on that lunar month, which is 2 Feb.
3. Find 2 Feb on this circle diagram
4. For **Phakka/BuddhaKanit**, follow the 2 Feb line to Pink ring, and find **red3/black3** indicating 3th month on both calendars
5. For the RTC, determining intercalary is a prerequisite. If it's a leap-month year, use Blue ring, otherwise use Green ring. Since 7 in Group#9 falls on Blue strip on the plate, so 2007 is a leap-month year.
6. In this case follow the 2 Feb line to Blue ring, and find it falls in the 3rd lunar month.

00	1	10	7	20	13	30	19	40	6	50	12	60	18	70	5	80	11	90	17
01	13	11	19	21	6	31	12	41	18	51	5	61	11	71	17	81	4	91	10
02	6	12	12	22	18	32	5	42	11	52	17	62	4	72	10	82	16	92	3
03	18	13	5	23	11	33	17	43	4	53	10	63	16	73	3	83	9	93	15
04	14	14	17	24	4	34	10	44	16	54	3	64	9	74	15	84	2	94	8
05	4	15	10	25	16	35	3	45	9	55	15	65	2	75	8	85	14	95	1
06	16	16	3	26	9	36	15	46	2	56	8	66	14	76	1	86	7	96	13
07	9	17	15	27	2	37	8	47	14	57	1	67	7	77	13	87	19	97	6
08	2	18	8	28	14	38	1	48	7	58	13	68	19	78	6	88	12	98	18
09	14	19	1	29	7	39	13	49	19	59	6	69	12	79	18	89	5	99	11

For AD 19xx, Years fall in group 8-14 contain intercalary month

For AD 20xx, Years fall in group 6-12 contain an intercalary month

To determine a leap-day year on the RTC, the calendar must run fast
 use 5/๗15 (Apr.), if the date mark falls in the yellow arrow gap,
 then that year is a leap-day year.

To determine month#
 Pakkha, use Pink ring
 RTC, in leap-month year, use Blue ring
 in common & leap-day years, use Green ring
